How to watch iPad pictures on TV in slideshow via WiFi

After a vacation or festival, you may have many photos that you want to watch with family and friends on big screen TV. In this article, I will show you how to play your iPad photos on TV with music and transitions via Airplay.

1. Before streaming photos to TV from iPad , you can use Photo Slideshow Director HD to turn your photos into a slideshow first. Import your photos to the app from iPad Photo Library, add songs as background music, apply dynamic transitions, customize the pan&zoom effects, sync slideshow to music, set slides and transitions time, and etc.

Download Photo Slideshow Director HD to create a slideshow on iPad and stream it to TV!

2. Set iPad and Apple TV in the same Wi-Fi network.

Note: To use Airplay, Apple TV and iPad should both run iOS5 or latter. That means it does not work on iPad1 and Apple TV1.

4. Touch Airplay icon and check "Apple TV" and toggle the Mirroring switch to On.
